

OH!CANARY Craft Stick and Watercolor Sculpture

Step 1: Connect your craft sticks one at a time. Dip a craft stick into the wood glue to apply the glue to each connection.

Step 2: Press each craft stick joint with your finger after gluing for a couple of seconds before moving to the next.

Step 3: Make as many connections as you can to build up a composition! The more you can connect both sides of the craft stick to each other, the stronger your sculpture will be.

Step 4: Paint with the watercolor palette by dipping the brush into the water and then the paint. Once you have painted the whole sculpture, wait to dry and then tie up with the string.
